

TM Liquid In-Line Turbine Flow Meter

Highly Accurate and Reliable Liquid Flow Metering

Turbines, Inc. is a leader in the design and manufacture of reliable and accurate turbine flow metering equipment, electronic monitors, and accessories. All of our products are engineered, manufactured, and calibrated using premium quality materials by a skilled engineering team, using state-of-the-art equipment.

The **TM Series Liquid Turbine** flow meter is a highly-versatile product line that offers all stainless steel, precision-machined components with CD4MCu and/or 416 steel rotors. Available for flow ranges from 3/8" to 10", Turbines Inc.'s TM Series meters can handle line sizes as small as 1/2" and up to 10".

The TM Series is designed specifically for liquid applications and can be configured with a variety of end arrangements, including threaded, flanged, grooved, or any other means as specified.

The TM Series provides +/- 1.0% standard accuracy, and is repeatable to +/- 0.10% over the entire flow range. For every turbine flow meter manufactured by Turbines, Inc., a unique K-factor is established by means of a NIST-traceable factory calibration.

Specifications

Performance Data	
Accuracy	+/- 1.0% over flow range (except TM0038 which is +/- 2.0%)
Repeatability	+/- 0.1% over flow range
Operating Temperature	-100° F to +300° F
Connection	Flanged, Victaulic® (grooved), or threaded
Materials	
Meter Body	316 stainless steel
Rotor Supports	316 stainless steel
Meter Rotor	CD4MCu/416 stainless steel
Rotor Shaft	Tungsten carbide
Sleeve Bearings	Tungsten carbide
Certifications	ISO 9001
Additional Information	Full line of economical Retrofit Kits are available Factory refurbishment with one (1) day turnaround is available
